## Summary

Systems Engineer and Full Stack Developer with a diverse background in mobile and web development, automation, and product management. Skilled in Flutter, Python, REST API integration, and cloud services, with proven experience in developing scalable solutions and optimizing internal processes. Passionate about leveraging modern architectures and agile methodologies to drive project success.

## Work Experience

**RPA and Application Developer** at [QFD solutions](#) working for [Arajet](#), Colombia *November 2023 – October 2025*

- Automated key internal processes by developing RPA solutions.
- Designed and deployed serverless applications using Azure Functions and App Services.
- Developed the user interface for a critical platform used to manage passenger disruptions, improving agent response time and passenger communication during incidents.
- Built and deployed a new check-in application currently used across 5 base airports, streamlining the passenger check-in process

**Product Manager** at [Planet Oliver](#), Colombia

*October 2022 – February 2024*

- Led product management initiatives and provided development support and improvement using Flutter.
- Spearheaded the migration of a monolithic backend to a scalable microservices architecture using Docker and Azure and enhancing system resilience.

**Head of Development** at [QFD Solutions](#), Colombia

*April 2022 – October 2022*

- Provided development support using Flutter and integrated REST APIs.

**Analyst Developer** at Anri, Colombia

*February 2022 – April 2022*

- Developed mobile applications with Flutter.
- Integrated REST APIs and built backend servers using Python and Django Rest Framework.

**Mobile Analyst Developer** at [Croper](#), Colombia

*July 2021 – February 2022*

- Developed mobile applications with Flutter.
- Integrated REST APIs and implemented maps and dynamic forms.

**Development Engineer** at [Comsatelites GPS](#), Colombia

*March 2021 – June 2021*

- Automated processes and developed applications.
- Managed cloud servers using Azure instances.

## Education

**University Master's Degree in Intelligent Systems**

*October 2025 – Present*

- Universidad de Salamanca, Spain

**Systems Engineering**

*Graduated 2022*

- Universidad Autónoma del Caribe, Colombia

**Academic High School Diploma**

*Graduated 2017*

- Colegio San Francisco, Colombia

## Skills

- **Languages:** C#, Typescript, Dart, Python, SQL.
- **Mobile Development:** Advanced Flutter (Bloc, Riverpod, RxDart, GetX, Hive, SQLite, Clean Architecture), mobile app publishing.
- **Web Development:** REST API integration, Django, FastAPI, React and Next.js.
- **Automation & Tools:** Selenium, tkinter, Pandas.
- **Cloud & DevOps:** Azure, Docker, microservices, CI/CD.
- **Data & Visualization:** SQL, structured databases, Power BI.
- **Methodologies:** UML, Agile (SCRUM).
- **Version Control:** Git.
